Album Cover

- From black cardstock, cut 2 identical pieces measuring 18cm x 22cm.
- Join these 2 pieces of cardstock together to create a single piece of cardstock measuring 36cm x 22cm.
- Apply DST around the outside edge of the hardboard as well as a few strips in the centre of the hard board.
- Starting with the spine, place it in the centre (top and bottom and left to right) of this newly created "outer cover", then add a piece of 6mm tape on either side of the

spine (you need this gap to stop the spine from tearing) before attaching the covers in line with the base of spine.

- Pop some DST all around the outer edge of the cardstock. Mitre corners, remove DST and fold cardstock in to complete the outer cover.
- From PP5508, cut a piece that measures 15cm x 16,7cm for the front inside cover and stick DST around the outer edges on the wrong/plain side.
- From PP5509, cut a piece that measures 15cm x 16,7cm for the back inside cover and stick DST around the outer edges on the wrong/plain side.
- To stop your inside covers from bulging, you will need to do the following:
 - Add a strip of 12mm tape on each side of the 6mm DST on the hard board (4 pieces in total running from top to bottom of the spine).
 - Add another strip of tape to the spine.
 - Add 2 strips of tape to the inside covers to assist with anchoring the pattern paper.
- Carefully remove the DST from the hardboard, including the DST from the 6mm gap between the hardboard and the pattern paper, and attach the inside covers to both front and back.
- Make up the base pages as per the instructions and adhere to the mini album.
- See photos below.

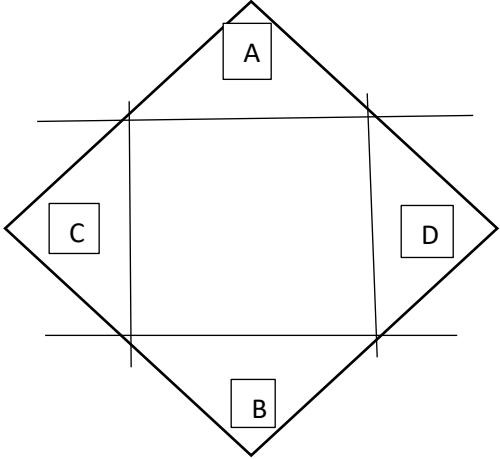

Decorating the Front Cover and spine

- From PP5508, cut a piece of patterned paper measuring 11cm x 16cm. Mat in red and then green cardstock. Adhere to front of mini album. Add fussy cutting elements. I raised the lantern to create depth and interest and added a few fussy cut elements that I had precut. Apply Galaxy Gold Brilliance to the chippie and adhere to the front cover.
- Add a small strip of paper to cover the join on the spine as well as a fussy cut bow to add interest.
